# Client

Says | Does | Thinks | Feels

I like choosing my own provider

Of course I know pay pal

**Concern around Services**

- I like the visual explanation
- Do i have to pay?
- Im concerned about you and my money
- How much will this cost me?
- I felt better after CM came and spoke to me
- Can you show me?

**Services**

- Sometimes they have a service in mind
- 9/10 already have an agency (already with a provider)
- Compare services
- They can give a top up if they want a more expensive provider
- They sign pay pal consent account

**Care**

- Exception criteria (fast track to RAS)
- Only new clients go through reablement

Worried about security

Fraud

I understand the complicated explaining budgets (just the words can be confusing)

**Negative**

- Frustrated
- Nervous
- Unfamiliar with system
- Confused

**Positive**

- Im happy with the way the CM explained pay pal
- I like the idea of a personal budget
- I like the face to face with the CM

# Provider (Leon - not in admin capacity)

Says | Does | Thinks | Feels

Why does it take so long to get first payment

I need more info on the client

why are my offers not accepted (we've also not told if we are rejected)

as a small provider, the process is an opportunity to sell my services

Good communication, would be better if it was in the system

I dont always know when a service starts

Set up a paypal account

Run a business

list their services

register their business and list their services to local authorities

some clients want to meet their providers and meet with them (sometimes there is a preference from who)

schedul carers to provide services

provide serviives to eligible ppl

respond to enquiries

process refunds anfd over payments

I think iys a good system

I think its easy to use

I think more info could be sent to me vs. the SU

Alot of this info is captured in the assessments and is not sent along

It needs to be more structured (it just depends on the individual sending it at the amount)

Payments could be processed quickker

'Channel Billing' allows payments to be processed quickker

Generally my costs are increasing

EG national NLW is increasing as wellll as pensions

conected and engaged

Hard to define my offerings

Personal budgets empower users

The whole syste allows me to market my services

Whole system gives god choice and control to users and providers

for providers, I can really control my intake

The system could do more to support my wo

EG I cannot update the support plan which is annoying

I cannot provide feedback to let finance know that the allocated hours are not enough

# Manager of care managers

Says | Does | Thinks | Feels

We didn't know there were issues with that provider (not flagging providers)

forms need to change to reflect modern day (RAS)

Fix and cull system as we go

**System**

- I know its extra work but you need to tick that box for the system to work
- Can the system work better for us
- bit frustrated if system is slow (pay pal and PWI)
- Too many unessary episodes

(sometimes)

- Conflict resolution

(getting better - in progress)

- working with other teams
- work with P3 team on review with providers and new enquirys

60/70% of time on incoming tasks CM and SW scanes, merry p3

approval / rejection

review and authorise support plan

**Concerns re. system**

- (system as in organisational structure of teams) can be problematic
- our team can be a bottleneck for McEP
- worried that as things get bigger our teams workload will increase
- It would be easier if some episodes would be gone

**Frustration**

- feels frustration of CM and service users
- process could or does have days/weeks of delays in episodes in work in the process for the SU

eager for system to work better

**Positive**

- happy to promote personal budget (we believe in it)
- I feel satisfied
- Im happy that current levels of authorisations are appropriate
- Proud of how we support nobody is at risk (deal with risk quickly)

lil like the draft plan to be in the system (more about fields on form)

There can be a big gap between interim care and final plan approved

often it comes down to the panel and all work done before was needless

Lots more self funders now, and they take time to review

**Working with providers**

- F.A. in charge
- Allocate work to providers
- liase with provider over issues
- Mediate when things go wrong with providers and client
- Transfering info to provider isnt clear

Adult transitional care/ home care

Supervision with individuals - why they have this case for so long

# Client

visits the clients in their homes

you have been assess to contribute x pounds

do you consent to disclosing your finances

who helps you with you r finances if anyone

are you able to fill out the financial form

do you have savings above the threshold

light touch assessments, prelim questions

work with other orgs ie. DWP and HAD

**McEP**

- check out
- pay pal
- verify details of care plan ie cost and start date
- correct purchase order
- close plan

**FWI**

- calculate client contribution
- run financial assessment
- check case notes for an idea of circumstances
- benefit check with DWP
- annual financial review
- handles appeals
- capture info on benefits and assets

**PB**

- personal budget monitoring
- referral to other team
- FWI comissioned care (pay providers directly)

calls client to collect FA form

# Care navigator

Says | Does | Thinks | Feels

**More info**

- how can i help
- i need more background on client
- i need more clarity
- what are the neds of this person

**Work load**

- this work lods is immense
- we need more staff

this system is not fit for purpose

too much red tape

**Client**

- wish i could do more for my clients
- is this the best service

**Positive**

- success
- empathy
- proactive, resourceful, determined, willingness to help people, ie. promote income
- satisfaction in helping clients
- involved with their case

**Negative**

- conflicted
- overwhelmed
- limited in what i can help with
- frustration

# Client

- we werent aware we had to make a complaint - client
- Thank you - client
- Client is a nightmare
- I am not used to reading english - client

Framework i not financial freindly

Cash P.B. is a set rate paypal is not

Is this person suitable for this package or this one

**Budget**

- Transfer cash to direct payments team
- Monthly meetings on paypal / cash pb
- Paypal has to be done 3/4 days beforehand

**Working with SU**

- Make sure client knows their rights
- Send care navigators out to monitor accounts
- Meet (advocates) family
- Monitor the environment of the client

# Manager of Care Navigators

SAYS | DOES | THINKS | FEELS

**Provider**

- If we cant pay provider all hell breaks lose
- There should be a cut off point, which they dont follow provider

**Communication**

- Communication important
- All in the same building would be great

**Procedure**

- Forget about procedure if it needs to be
- Procedures are there to be adhered to unless they dont work

**Staff**

- Who's best for the community - language barriers - skills
- Constraints around staff

Is she a mental health person, does she have mental health needs

**Positives**

- Client Sends an email - positive, good
- Good - positive - care navigators bring Eleniion back into the system

**Negatives**

- Frustrated - Time frame
- Frustrated negotiation period
- Frustrated as they come back with challenges

**Working Process**

- Different building means longer communication periods - frustration
- Close contact with care managers
- Could do with more staff

**Payments**

- Missed the payment cycle

Put my pro head out

# PROVIDER

SAYS | DOES | FEELS | THINKS

Review Timescale for another assessment

Do the assessment with us, Harrow & Provedor

What have i got in my office to do this assess, hospital, council

You cannot go to a muslims house and prepare pork

Know why you want to register

Communication is vital

Where are your policies

why are you giving me a job before you know rate

now it should be streamlined in working together

We pay the commission (pay pal)

Care place has worked- all we do is advertise our services

Need enough information to properly understand

people will call, is where there, where is he?

safegurarding takes a long time to flag

Who am I dealing with

who do i report to?

often I go to client to see the plan doesnt meet client needs

I train my employees a lot to identify any form of abuse

What do i do

safeguarding SU from abuse

financial emotional neglect

download the registration form and input info and send it

rota: manually add the carer to the client

SU depends on cultural preferences

ive the providers do a different care plan than the councils that dont match

have to go back to the office to change something the care navigator (communication is difficult)

boils down to one thing (duty of care)

register with CQC

prove that you are providing safe and effective care through the policies

register UKHCA

local authority to be a REGISTERED provider

come and do inspection

train staff to the level to meet quality assurance

anxious about the process

communication is disjointed between provider and care manager

pay pal payment process is slow and painful

its difficult to keep track of all of the pay pal payments to all of the clients

wastage (time)

cost of the system comes to P3 - very difficult

Council: 'this person needs xyz'

we can save the council millions of pounds

save time

quality assurance

apps are not affordable

fit criteria

health and safety

thinking about staff

staff health and safety

quality of care will go down with bidding by agencies

track time and effort with service user

systems are priced out for providers as profit margins low

big agencies sell sub-contract to smaller ones with no real profit

if harrow could say to providers - 'we are saving you time, we want a different area' (not happening)

what level of risk is there to the staff?

complient

# Care Manager

SAYS | DOES | FEELS | THINKS

**MCeP**

- Search engine MCEP
- Providers not on MCEP
- Why hasnt the provider responded
- Offers on Care place

**MCeP & FWi**

- Duplication
- Framework - MCEP linking the two
- Disjointed
- Simple temptae to make enquiries
- Case Notes
- Should be working on one system

**Duty**

- Follow up reminder
- Duty/ increase + decrease P3 service advice tasks

Talk about cases

**System**

- Would like simple system
- simple but frustrating
- Providers dont understand the system
- All teams have understanding of MCEP, or PL2.3
- Slow MCEP
- System Slow

How do you find your interim provider

Speaking to manager

Too much work and not enough time

**Client / Home Visit**

- Paypal consent - client home visit
- Safet - cleint home visit
- Confidentiality and privacy
- Need to keep clients confidential
- Easy part of job

Planning and discussing budget with client

Completing panel

Personal budget agreement (contracted signed)

Budget

Enquirires on MCEP

How to work with system if self funding

Case load

Workflow - P1 - p2, p3 - p2 , CM - CN

**Working with other teams**

- If circumstances, Energy retrieve to other team Long Term Conditions reablement/caring assessment
- Pinacial assessment carried and cheatsmeet keep Finance Team (Finance Assessment and MCEP completed)
- Approved cases on MCEP to not auto be passed to C.N. team
- Taking long time for C.N. to set up and process payments

Uploading docs

Explain simply the new MCEP system to support staff and client and providers

Support plans

Duplicates information

PANEL

Relaying info between Framei and MCEP

**Client**

- Visists client home
- Calling service user
- Visits
- Appointments/ visists

**Planning**

- Uses MCEP to set up plans
- Setting up paypal
- re RAS requests
- Set up plans to work methodically
- RAS requests
- Agency rates higher than RAS rates
- Panel prep
- Get ready for funding panel
- Think of creative way out of the box and system

Worried there is a discopency in the system

Repetitive

Enquires are frustrating on Care Place

Frustrated

**Anxious**

- Anxious
- disclosure of bank details - client anxious and unhappy
- Family members challenging

**Happy**

- Happy when client is happy with their plan
- In control
